

## **ACTION PLAN SOUNDSCAPE MANAGEMENT**

JANUARY 15, 2020

### **PARTICIPATE TO THE CONSULTATION**

---

Soundscape management is a priority for ADM Aéroports de Montréal. It aims to mitigate the noise impacts of air operations and to maintain a harmonious cohabitation with neighbouring communities.

In 2019, ADM drew up an action plan to optimize soundscape management. ADM hired Helios, a firm with expertise in this area, to identify and analyze best practices at 30 comparable international airports.

The [2019-2023 Soundscape Management Action Plan](#) is composed of some 20 actions in eight categories:

1. Complaints Management
2. Nighttime Operations
3. Encouragement for the Use of Quieter Aircraft
4. Noise Abatement Procedures (landing and takeoff)
5. Noise Measurement and Soundscape Reports
6. Land Planning
7. Relationships with Neighbouring Communities
8. Preferred Runways System

ADM would like to collect comments on the action plan from citizens of YUL Montréal-Trudeau's neighbouring communities. The action plan is part of an online public consultation. We invite you to read the plan and take part in the consultation by clicking [here](#).

**The consultation ends on March 31, 2020.**

ADM is completing the implementation of an interactive platform for the complaints indicators that will be available on the ADM website. The complaints indicators for 2019 will be published at the end of January. A newsletter will be sent upon publication.
