MARCH 30, 2019

AIRSIDE CONSTRUCTION WORK: REHABILITATION WORK ON THE NORTH RUNWAY (06L-24R)

As of March 31, ADM Aéroports de Montréal will be resuming construction for the rehabilitation of the north runway (06L-24R). This phase of the project should be completed in June 2020.

There will be no modification to the actual runway assignment that has been in place since December 2019.

Please note that the Government of Canada decision to close Canadian borders generates a massive decrease of air traffic in Canada, including at YUL. Several air carriers have taken the decision to reduce and even cease their activities, consequently, the number of movements at YUL are decreasing.
