## **NORTH RUNWAY – OPERATIONAL AT ALL TIMES**

---

As in the winter season of 2020-21, and to maintain reliability and safety standards during the winter season, the north runway (06L-24R) will again be operational at all times.

Flight paths of the north runway overfly the areas of north Dorval, Pointe-Claire, north Saint-Laurent and Ahuntsic-Cartierville.

Maintenance work in the upcoming weeks will require short-term closures of one or the other of the two runways. This information is posted on WebTrak.

[WebTrak](#) is a soundscape reference tool. It displays, almost in real time, flight paths, aircraft types and altitudes, as well as the noise levels recorded at noise monitoring stations, and allows you to easily report a flight.
