

## ADM awards construction management contract to Pomerleau, SNC-Lavalin and Kiewit

**Montréal, May 15, 2019** – ADM Aéroports de Montréal has awarded the construction management contract for the completion of its major cityside development program to a consortium consisting of Pomerleau, SNC-Lavalin and Construction Kiewit Cie (PSK).

Under this initial five-year contract, PSK will act as a partner and key collaborator throughout the execution of the work. The consortium's mandate includes managing the program's design, assessing constructability, and identifying opportunities to optimize the schedule and phasing of construction.

"By using this innovative contract model of risk-based construction management, ADM will benefit from additional significant expertise for the implementation of this program, which will definitely change the face of YUL Montréal-Trudeau International airport," said Philippe Rainville, President and Chief Executive Officer of ADM. "We are pleased to be working with companies that have solid expertise in carrying out projects of a similar scope."

ADM is planning to invest \$2.5 billion to facilitate inter-modality and access to the airport site. The project includes the construction work and development of an underground station for the REM. It also involves the rebuilding of two major infrastructures: the multi-level parking complex and the drop-off/pick-up zones. In addition, the YUL Transit space will give users access to the airport terminal, the parking lots, the REM station, the bus terminal and various forms of public transportation.

"Whether for a long trip overseas or for a few hours of transit, airports still play a key role in a travel experience," said Pierre Pomerleau, President and Chief Executive Officer of Pomerleau. "As part of this historic construction project, Pomerleau's mission is to carry out work that will help raise the international profile of one of Canada's most important showcases, YUL Montréal-Trudeau International Airport. Together with our partners, we will implement cutting-edge designs, leverage the interdisciplinary capabilities of our teams, and benefit from innovative technologies."

"Like major international airports, YUL Montreal-Trudeau International Airport will benefit from frequent and reliable access at all times; REM and the new access network will ease transit," said Jonathan Wilkinson, President, Infrastructure, SNC-Lavalin. "We are proud to bring our airport infrastructure expertise and experience to a project of this quality. We look forward to working collaboratively and in synergy with our partners in PSK Construction, to develop innovative solutions to enhance the customer experience and prepare the airport for the future."

"YUL Montréal-Trudeau International Airport plays a crucial role in our economy and contributes to our quality of life," added Jean-Pierre Gauthier, Vice President of Construction at Kiewit. "We are proud to be part of this important project that will help increase and enhance the way we welcome residents, visitors and business people."

**About Aéroports de Montréal**

ADM Aéroports de Montréal is the airport authority for the Greater Montréal area responsible for the management, operation and development of YUL Montréal-Trudeau International Airport and YMX the International Aerocity of Mirabel.
