AÉROPORTS DE
MONTRÉAL

Work on Lot 7

August 2018

Aéroports de Montréal (ADM) wishes to inform you of work currently taking place on the Lot 7 site at Montréal–Trudeau airport.

The work to install the noise barrier is progressing well.

Noise barrier

In the next few weeks we will begin planting of trees and other vegetation, based on the choices you made.

During their inspections of the woodland, our experts noted a number of trees that are dead or pose safety risks. As a result, we will be cutting down these trees located in the 25-metre buffer strip.

This work will begin tomorrow (Tuesday, August 28). To that end, vehicles will need to operate along Thorncrest Avenue, but will do so between 9 a.m. and 3 p.m. so as not to hinder residents as they come and go.
