

SOUTH RUNWAY CLOSED UNTIL JUNE 2, 2021

The sealing joints work as well as the electrical work on the lights of the south runway (06R-24L) will continue until June 2, 2021.

The runway will therefore remain closed until the end of the work and flights will continue to be assigned to the north runway (06L-24R) during this period (north Dorval, Pointe-Claire, north Saint-Laurent, Ahuntsic-Cartierville).

[WebTrak](#), in addition to displaying, almost in real time, flight paths, aircraft type and altitudes, as well as the noise levels recorded at noise monitoring stations, contains messages on short-term runway closures or any other information that affects runway assignments. WebTrak also allows you to locate your address and submit a complaint linked to an aircraft movement.
