

ENVIRONMENTAL POLICY

ADM Aéroports de Montréal, integrates environmental considerations into its activities from an environmental protection and sustainable development perspective. ADM intends to be proactive in environmental matters in the management, operation and development of its airports.

GUIDING PRINCIPLES

- » Ensure compliance with applicable environmental legislation and regulations, as well as with other commitments to which ADM subscribes;
- » Prevent pollution and minimize the environmental impact caused by both the operation and development of its airport lands, as well as by its procurement activities;
- » Conduct environmental monitoring of ongoing operations at its airport sites;
- » Continuously improve its environmental performance and adopt ambitious environmental objectives;
- » Operate in a manner as to maintain its ISO 14001 certification;
- » Continue efforts to ensure proper management of the soundscape;
- » Plan the development of its airport sites while respecting the surrounding environmental constraints;
- » Adapt activities and infrastructure to climate change;
- » Collaborate on improving environmental protection with government authorities, the community, as well as with other key actors in the field;
- » Train and educate its employees on environmental protection in the completion of their tasks.

PRIORITY AREAS FOR IMPROVEMENT

- » Improve energy efficiency and reduce greenhouse gas (GHG) emissions, to achieve the net zero objective;
- » Apply the 4R principle: reduce at source, reuse, recycle, and recover residual materials, to achieve the zero-waste objective;
- » Reduce drinking water consumption;
- » Protect and enhance natural environments of high ecological value on its sites to preserve biodiversity.
