

Airport development work on Lot 7

NOVEMBER 2016

Aéroports de Montréal (ADM) wishes to inform you of work currently taking place on the Lot 7 site at Montréal–Trudeau airport.

The roadway construction work is finished. The envelope of the building for the non-passenger screening vehicles (NPSVs) checkpoint is almost completed.

By November 14, we will have completed paving work near the NPSV building.

Beginning in mid-December, all outdoor work will be completed and we will be working inside the building. The project is still scheduled for completion in April 2017.

Roadway and parking lot

There may exceptionally be work during the weekend. We would like to point out that construction site operating hours are within the times authorized by the City of Dorval

<http://www.ville.dorval.qc.ca/en/information/noise>.

We are finishing analysis work for the sound barrier. Neighbourhood residents will receive more information early in 2017.

If you wish to receive information on Lot 7 work, we invite you to send us your e-mail address at: info@admtl.com.
